

Bella Construction Project

Project: The Indianola Homes
Developer: Bella Construction LLC

Bella Construction developed and built three, 2,200 square foot Craftsman-style homes in different locations in Indianola, Washington, a community on the Kitsap Peninsula. The homes'

designs, color palettes, interior and exterior finishes, siding materials, and extensive use of wood flooring, trim and casework gives each a distinctly Pacific Northwest flavor, and makes them ideally suited to their locale.
